

Editors' Preface

The present collection of articles is based on the symposium “The Prospective as a Grammatical Category: Evidence from Turkic, Iranian and beyond” held in Frankfurt a.M. in September 2013 (cf. <http://titus.fkidg1.uni-frankfurt.de/prospective/>). The purpose of the symposium was to explore proximative and prospective formations in an areal perspective, starting from Turkic, which shows dedicated morphology in a number of languages, some of which had already been studied previously, and then looking towards Iranian, where these categories have not been studied yet. Some other languages within or broadly at the edges of Turkic or Iranian speaking regions are also included, viz. Aramaic, Mongolic and non-Turkic languages of Siberia. For future research, it would be interesting and relevant to enlarge the perspective, for instance by including Armenian and Caucasian languages.

Highlighting historical, areal and typological aspects, the contributions in this book investigate the encoding of proximative and prospective semantics in closely related languages of Altaic (particularly Turkic) and Iranian. Articles devoted to genetically non-related languages address areal convergence of Altaic and Iranian in contact areas in various parts of Eurasia. Of particular typological interest are advances in our understanding of the semantic structures of proximative and prospective categories as well as in disclosing the sources and grammaticalization paths of the development of the respective forms. These aspects are summarised in the articles by the editors in Part I.

Our thanks go first of all to our authors for their contributions and their collegial spirit throughout the work on this volume. Most of them were also presenters at the symposium in 2013, and our thanks go to everyone who participated in this event. We are likewise grateful to the reviewers of the articles contained (and some not contained) in Part II and III: Anton Antonov, Elena Bashir, Christiane Bulut, David Erschler, Andrey Filchenko, Ilja Gruntov, Henryk Jankowski, Olga Kapeliuk, László Károly, Yaron Matras, Peter-Arnold Mumm, Julia Normanskaja, Brigitte Pakendorf, Gisela Prochazka-Eisl, Elisabetta Ragagnin, Lutz Rzehak, Elena Skribnik, Denis Tokmashev, Ghazaleh Vafaeian and Abdurishid Yakup. Murad Suleymanov kindly volunteered to check, among other things, the Azeri data and the Russian titles in the bibliographies, and Thomas Jügel helped with various technical matters. Special thanks are due to the editors of the series “Iran – Turan” for accepting this volume, and particularly to Ingeborg Baldauf for her expert feedback.

We gratefully acknowledge the support of the DFG (Deutsche Forschungsgemeinschaft), the Institute of Empirical Linguistics, the former Section of Turkic studies and the LOEWE Research Cluster “Digital Humanities” at the University of Frankfurt a.M. for providing us with the technical and administrative support for the symposium and with financial means for both the symposium and the printing of this volume. We are also grateful to all colleagues and students who worked as volunteers during the symposium. Finally, we wish to extend our thanks to our husbands, Christian Rammer and Ralf Gehrke, for the maps and for support in technical and other matters.
